Pro Bono Publico—For the Good of the Public

PREFACE

"A Greater Nation Through a Greater South"

Winston-Salem is situated in the west central portion of North Carolina, in that part of the State known as the PIEDMONT PLATEAU. The value of its factory products amounts to $1,000.00 per capita per annum. It is the county seat of Forsyth county. Forsyth is one of the richest agricultural counties in the State.

Climate—At an elevation of about 1,000 feet above sea level, in a section of the upper South where the most even tempered, salubrious, and best all-the-year-round climate to be found on the American continent prevails.

Labor—The surrounding counties, particularly the mountainous section, are peopled by a hardy, intelligent race of white people almost entirely of Anglo-Saxon origin, and black people of unusual physical energy, due to their climatic environment.

Power—Proximity to the coal fields, with direct connection through the Norfolk and Western Railway to the Pocahontas mines makes for cheap steam-power, and with the hydro-electric energy furnished by the lines of the Southern Power Company economic power is available for all uses, whether required in large or small units.

Raw Materials—The contiguous cotton fields secure an unlimited supply of raw cotton for manufacture into yarns and cotton fabrics.

The great number of cotton mills in the Piedmont Plateau makes available, at low cost, cotton yarns in a wide range of numbers for manufacture into hosiery, underwear, and sundry knit cotton goods.

Hardwood lumber in wide variety is economically available for manufacture into furniture, wagons, building materials, and sundry wooden articles.

The Virginia and Tennessee iron furnaces furnish an economic supply of PIG IRON for the manufacture of farm implements, machinery, stoves, columns and castings of great variety.

As an Industrial Center Winston-Salem is already pre-eminent, with a diversity of manufactured products, amounting in actual value to 38 million dollars annually, which is equivalent to 1,000 dollars per capita per annum.

Population—In 1880 the U. S. census showed the population in the two towns to be 4,194; in 1890 they had grown to 11,114; in 1900, with census figures combined, 13,650; in 1910 the U. S. census report was 22,700 inside the city limits. Since that time the territory has been enlarged, taking in 3,000 more, which, added to the normal increase, gives a city population of over 30,000. The population directly adjacent, though outside of the city limits, is 9,000, or more, making within the radius of a few miles a population of at least 40,000.

The City Directory

Why?

There's a Reason

Because. just as the magnetic needle points the way to the mariner, so does the Directory point the way which brings together the Buyer and Seller.
